About Learning Logs

Learning Logs are a unique, personalised learning resource for children. In the Learning Log, your child can record their responses to learning challenges set by their teachers. A learning log is not a record of what your child has 'done'; it is a record that shows what they have 'learnt'.

As the Learning Log is personal, your child is given the freedom to express their understanding any way they choose. Your child will be able to use many methods to complete their learning log projects. Please encourage your child to use their imagination in completing the tasks.

Your child may want to take or include photos, cut things out, paint, draw, colour, use ICT or use other ideas to present their ideas. It is up to them to choose; they can complete the project however they wish.

Giving children freedom allows them to think creatively and promote independent learning. This level of freedom acts as a great motivator for children as they begin to collaborate with their peers, start to share ideas and understanding.
