

Minibeast Hunt!

You will need: 1 Game board (A3), A set of minibeast tokens for each player, Coloured counters, dice or spinner.

Instructions: Sort the tokens into groups (ladybirds, butterflies etc.). Players move around the board collecting the corresponding amount and type of minibeast that is on the space they land on.

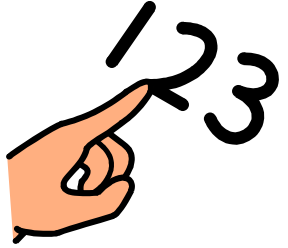

When all players have finished they should count up their minibeasts: the player with the most overall is the winner. This activity could be extended to become a data handling activity if desired. You could also use the tokens for sorting and classification as a separate activity.
