Read instructions then photocopy as many cards as you require.

Instructions: This game works like the numbers game on 'Countdown'. You can use one strip per group or have pupils using them individually. Pupils can pick 5 numbers (up to 2 each of HTU) and one operation card (all should be face down and shuffled). Layer the cards on the strip (largest number at the bottom) and do the calculation. Use for small group work and mental warm ups; you could even do it against the clock!
