How does a caterpillar change into a butterfly.

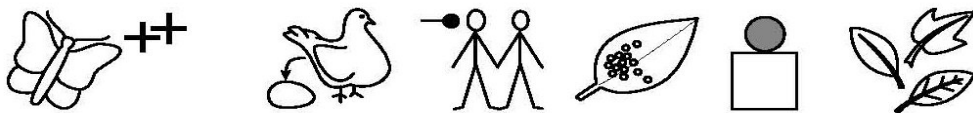

Let's find out.

Widget symbols ©Widget software, www.widget.com

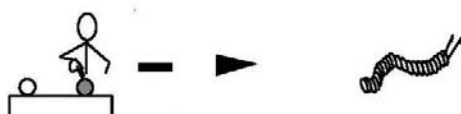

This is a butterfly egg.

Butterflies lay their eggs on leaves.

Widget symbols ©Widget software, www.widget.com

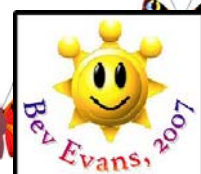

This is the caterpillar.

It hatches out of the egg and looks for food.

Widget symbols ©Widget software, www.widget.com

The caterpillar is now full.

It can not eat any more.

It turns into a chrysalis.

Widget symbols ©Widget software, www.widget.com

Something magical has happened!

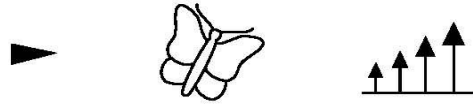

The caterpillar comes out of the chrysalis.

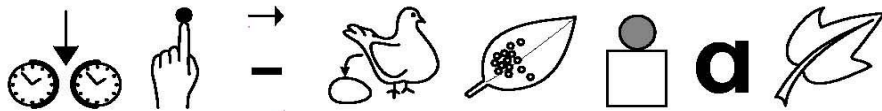

It is now a butterfly.

Widget symbols ©Widget software, www.widget.com

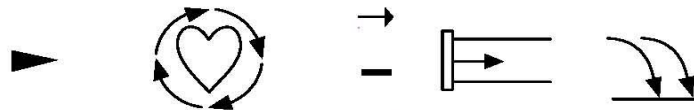

The butterfly grows.

Soon it will lay eggs on a leaf.

The life cycle will start again.
